SIXTH CLUB RACE. Course :- From the S.M. pier, Wellington Barracks, round a mark boat off Chunghas, the west minefield buoy, back to the Chunghue mark, and from thones to the starting line. There was a fine breeze at eleven o'clock and the first class went away at a great pace. Dark made a very blever start and was a good deal shood when the gus went; the other boats being so newhat poorly handled. Petrsl indeed got mixed up with jibs and spinnakers and it was some minutes before she could reaway. Payne, Stella, and Ladybird crossed the line abreast of one another, and after infling out for the middle of the harbour sent no spinnakers to sturboard. It was a dead run to the Changhus boat, and Payne as usual went the fastest to loward. Stelle and Ladybird rounded close together and Dart a second or so after them; the Petrel not haring been able to pick up her loss of time at the start was still some minutes astern. A short trip to windward brought the boats to the minefield busy and Dart came up on Payne, but although the R.B.'s from off his weather bow and the Pauno got round the buny a leader by about a minute Stella and Ladabird had dropped a bit autern but were still close together and Petrel was yet whipper in. Again on the run Paune was the fastest and when hauling round the Chunghue mark the second time had a good lead. From her to the winning line it was steady, windward ! work, and at first there was a slight heave of sea in which Payno could hold her own against Dart, but as the harbour was beared the LIII. boat crept up and steadily gained on the leader. After leaving the Kowlood very light, and Dart passed into first place and scored another win. Petrel, who had been

A DUTY ON SILVER.

A Hyderabad correspondent of the Bombay Gazette mentions that a duty of five per cent. is being levied by the authorities of that State on imported silver. The State of Jodapur has also imposed a duty on that metal amounting to seven and-a-half per cent. The Mints of the native States are coming silver the aggregate camount of a lakh a day. Some three crores of hearded silver are believed to have found their way back into circulation since the closing of the Imperial Mints, chiefly in payment for an equivalent amount of imported silver. The imports have at present practically ceased, but the fact that the rupes has now a higher value than an equal weight of silver will tend to bring out more of the hearded coim. Hitherto the people of India have put by some dive or six ereres of rupees per annum. Since the closure of the mints this process has been rerereed, and the rapees are coming into circulation: It is certain that a very large amount of ompany's rupses of the earlier years of Her Majesty's reign have found their way into general circulation. For the most part they appear just as if they were newly issued from the Mints bearing no sign of wear or usage. Owing to the considerable amount of hourded money which has come into the market it is not exproted that Sir David Barbour's measures will force the rapes up to or beyond one and fourpence in the coming season. After a period

THE object of the Company is to form and

Manufacture of Watches of all kinds and de-

For this purpose it is proposed to purchase

f Yokohama and thereon to erect the Factory.

The founders of the Company are possessed

of a plant of machinery complete in every

workmanship, and adapted for the making of all

implements used in the wetch trade, as well as

the making of watches. It is well known that

machinery has effected a complete revolution in

the watch frade, and it is confidently expected

that by availing itself of the comparatively

cheap labour of this country this Company will

be able to supply the trade in all parts of the

world with an article which for excellence of

workmanship and choapness of price will defy-

Mr. P. H. Wheeler, the Superintendent of the

Company, has been for many years engaged in

developing watch making machinery, and the

testimonible from his former employers testify

to his business ability, skill, and integrity. The

machinery of which the founders are possessed

has been perfected under his superintendence;

and a considerable part thereof is of his invention.

Besides the machinery the founders are possess-

ed of ten thousand watches in various stages of

completion which are the out-turn of the eaid!

turn out about twenty-five thousai .. more. It

will thus be seen that it is not an untried plant

which the founders have acquired, but one which

has already given proof of its excellence. It was

only the advantage of obtaining a cheaper labour

market than can be found in the United States

that has induced them to work the business in

It is an established fact that the principal

of the founders. The profits of watch making

It is not in the labour market only that an

advantage will be obtained. Coal and other

materials can be purchased in this country at a

lower rate than in the United States. And

there is one of still greater importance, the

knowledge to be obtained of the requirements of

the local trade, of the trade for China, and that

of " The Straits" and India. The Company will

be capable of supplying a watch of the best

workmanship to the population of these large

and important countries at a price far below any

watch of like character that has ever been offered

Taking into consideration these advantages

the founders confidently expect to pay a dividend

of at least 10 per cent. per annum on the first

two years' work and thereafter dividends at a
